85.19 account under section 18H.17, industrial hemp account under section 18K.07, or seed potato
85.20 inspection account under section 21.115, seed inspection account under section 21.92, or
85.21 grain buyers and storage account under sections 223.17 and 232.22.

85.22 Sec. 16. Minnesota Statutes 2024, section 21.111, is amended to read:

85.25 in this section shall have the meanings ascribed to them.

85.26 Subd. 2. ~~**Inspected.** "Inspected" means that the potato plants are examined in the field~~

For seed potatoes produced in a lab, certified means that:

(1) the seed potato lab facilities and the lab's procedures and protocols have been examined under the authority of the commissioner; and

(2) the seed potatoes have been inspected after they have been harvested, removed, or released from the lab, and were duly certified by or under the authority of the commissioner, as provided in sections 21.111 to ~~21.122~~ 21.125.

~~Subd. 3a. **Interstate cooperation.** In order to best use state resources, the commissioner may enter into agreements with other seed potato certification entities to carry out the purposes of sections 21.111 to 21.122. Any agreement may provide for field inspections, shipping point inspections, winter tests, and other certification functions to be carried out by personnel employed by either entity according to methods determined by the certification entities of the respective areas. The commissioner may extend seed potato certification services to states where growers wish to grow certified seed potatoes and the state does not have a seed potato certification program. 87.8 commissioner has examined the plants in the field where the plants are grown and has
87.9 visually assessed the plants for disease and factors impacting quality.

87.10 (b) For harvested potatoes, inspected means that the commissioner has observed the
87.11 tubers and, when requested, the commissioner has evaluated the tubers for quality and
87.12 conditions described in section 21.125.

87.26 for sale, or held with intent to sell or as a sample representing any lot or stock of potatoes
87.27 offered or exposed for sale or held with intent to sell within this state, for the purpose of
87.28 planting.

88.8 Sec. 17. Minnesota Statutes 2024, section 21.112, is amended by adding a subdivision to
88.9 read:

88.10 Subd. 1a. **Interstate cooperation.** In order to best use state resources, the commissioner
88.11 may enter into agreements with other seed potato certification entities to carry out the
88.12 purposes of sections 21.111 to 21.125. An agreement under this subdivision may provide
88.13 for field inspections, shipping point inspections, winter testing, and other certification
88.14 functions to be carried out by personnel employed by either the commissioner or other seed
88.15 potato certification entities according to methods determined by the seed potato certification
88.16 entities. The commissioner may extend seed potato certification services to a state where
88.17 growers wish to grow certified seed potatoes and where the state does not have a seed potato
88.18 certification program. Any agreement under this subdivision must be reported to the chairs
88.19 and ranking minority members of the legislative committees responsible for the budget or
88.20 policy of the seed potato inspection program and to the commissioner of management and
88.21 budget.

88.22 Sec. 18. Minnesota Statutes 2024, section 21.113, is amended to read:

88.23 **21.113 SHIPPING POINT CERTIFICATES OF INSPECTION; CERTIFICATES**
88.24 **OF ORIGIN; AND BULK CERTIFICATES.**

88.25 Subdivision 1. **Shipping point inspections.** (a) The commissioner shall issue shipping
88.26 point certificates of inspection only when seed potatoes have been inspected while growing
88.27 in the field and again after being harvested.

88.28 (b) For seed potatoes produced in a lab or greenhouse, the commissioner shall issue
88.29 certificates of inspection only after:

88.30 (1) the seed potato lab growth facility and the lab's growth facility's records have been
88.31 inspected; and

89.1 (2) the seed potatoes have been inspected after they have been harvested, removed, or
89.2 released from the lab or greenhouse.

89.3 (c) Certificates of inspection under this section shall show the varietal purity and the
89.4 freedom from disease and physical injury of such potatoes and any other information as
89.5 may be prescribed by ~~rules adopted and published under~~ sections 21.111 to ~~21.122~~ 21.125.

89.6 Subd. 2. **Other certificates.** (a) The use of a certificate of origin requires the approval
89.7 of the seller and the purchaser and must only be used for intrastate shipments between
89.8 certified seed potato producers. The certificate of origin must contain information considered
89.9 necessary by the commissioner and must at a minimum identify the producer, receiver,
89.10 variety, classification, quantity, date of shipment, and lot of the seed potatoes. The limitation
89.11 of warranty as described in paragraph (c) must not include any representation of the condition
89.12 of the potatoes at the time of shipment. A certificate of origin must only be used for intrastate
89.13 shipment if a shipping point inspection is not available. Use of a certificate of origin must
89.14 be approved by the commissioner prior to shipment.

89.15 (b) A bulk certificate must include the date of issuance, class, grade, lot number, and
89.16 approximate weight of the load.

89.17 (c) A certification does not represent a warranty of any kind, express or implied, including
89.18 merchantability, as to the quality of the crop produced from the certified seed potatoes. A
89.19 certification must only represent that the seed potatoes were produced, graded, sacked or
89.20 placed in bulk, and inspected in accordance with this chapter. A certification under this
89.21 subdivision must not include any representation of the condition of the potatoes at the time
89.22 of shipment.

89.23 Sec. 19. Minnesota Statutes 2024, section 21.115, is amended to read:

89.24 **21.115 FEES; SEED POTATO INSPECTION ACCOUNT.**

89.25 The commissioner shall fix the fees for all inspections and certifications in such amounts
89.26 as from time to time may be found necessary to pay the expenses of carrying out and
89.27 enforcing the purposes of sections 21.111 to ~~21.122~~ 21.125, with a reasonable reserve, and
89.28 shall require the same to be paid before such inspections or certifications are made. All
89.29 moneys collected as fees or as penalties for violations of any of the provisions of such
89.30 sections shall be paid into the agricultural fund and credited to the seed potato inspection
89.31 account of the commissioner, which account is hereby created and appropriated for carrying
89.32 out the purposes of sections 21.111 to ~~21.122~~ 21.125. Interest, if any, received on deposits
89.33 of these moneys shall be credited to the account, and there shall be paid into this fund any

90.1 sum provided by the legislature for the purpose of carrying out the provisions of such
90.2 sections.

90.3 Sec. 20. Minnesota Statutes 2024, section 21.117, is amended to read:

90.4 **21.117 APPLICATIONS FOR INSPECTIONS; WITHDRAWALS;**
90.5 **AMENDMENTS.**

90.6 (a) Any person may make application to the commissioner for inspection or certification
90.7 of seed potatoes growing or to be grown. Upon receiving such application and the required
90.8 fee and such other information as may be required, the commissioner shall cause such
90.9 potatoes to be inspected or certified in accordance with the provisions of sections 21.111
90.10 to ~~21.122 and the rules adopted and published thereunder~~ 21.125.

90.11 (b) If a grower wishes to withdraw ~~a field or lab~~ an application after having made a
90.12 timely application for inspection and such withdrawal is requested before the field or lab
90.13 inspection has been made, the fee paid shall be refunded to said grower. A grower must
90.14 submit a withdrawal request in writing and include a reason for withdrawal. A grower must
90.15 remove withdrawn acres from production before the first field inspection.

90.16 (c) If a grower wishes to amend an application after submitting a timely application for
90.17 inspection, the grower must submit the request in writing, including a reason for the
90.18 amendment.

90.19 Sec. 21. Minnesota Statutes 2024, section 21.119, is amended to read:

90.20 **21.119 USE OF CERTAIN TERMS FORBIDDEN; EXCEPTIONS.**

90.21 It shall be unlawful to use or employ the term "certified" or the term "inspected," or any
90.22 term or terms conveying a meaning substantially equivalent to the meaning of either of
90.23 these terms, either orally or in writing, printing, marking, or otherwise in reference to or in
90.24 connection with, or in advertising or characterizing or labeling seed potatoes or the containers
90.25 thereof, unless such potatoes shall have been duly inspected and certified pursuant to the
90.26 provisions of sections 21.111 to ~~21.122~~ 21.125.

90.27 Sec. 22. Minnesota Statutes 2024, section 21.1195, is amended to read:

90.28 **21.1195 MINIMUM STANDARDS FOR PLANTING.**

90.29 (a) Seed ~~Seed~~ Potatoes may not be planted in the state in lots of ten or more acres unless the
90.30 seed meets the minimum disease standards prescribed by the commissioner. ~~Seed~~ Potatoes
90.31 may meet the standards by being certified in accordance with this chapter and rules adopted

by the commissioner, or under the certification program of another state or province which, in the judgment of the commissioner, provides equivalent assurances of seed potato quality. ~~Seed~~ Potatoes may be planted without certification if they have had at least field inspection as required for certified seed potatoes, have passed the field inspection standards of disease tolerance, and are free from ring rot. ~~A person that plants seed potatoes in violation of this section is subject to a civil penalty of \$20 per acre for each acre or part of an acre planted in violation of this section.~~ Failure to maintain complete and accurate records in accordance with this section ~~or rules adopted by the commissioner is an additional violation resulting in a separate civil penalty of \$200 for each failure~~ is a violation and subject to enforcement under chapter 18J.

(b) If there is not available to be planted in this state, in any year, a sufficient volume of potato seed meeting certified seed potato disease standards, in any or all varieties, the commissioner may, upon application by one or more growers, permit seed that does not comply with this section to be planted for that growing season if the seed does not pose a serious disease threat.

(c) Each grower shall keep records of each lot of ~~seed~~ potatoes planted. For each growing season, the records must include, by field, the variety, planting location, and source of the seed potatoes. Each grower shall register fields and file records as prescribed by the commissioner. All records must be made available for inspection by the commissioner or the commissioner's agents during normal business hours.

(d) In addition to the enforcement powers and penalties in this section, the commissioner may issue a subpoena to a grower in order to compel delivery of records which are required under this section. These subpoenas are enforceable by any court of competent jurisdiction.

Sec. 23. Minnesota Statutes 2024, section 21.1196, subdivision 2, is amended to read:

Subd. 2. **Restriction.** ~~(a) The seed potato certification requirements under sections 21.111 to 21.122 apply to potatoes grown in plots of ten acres or more in the restricted seed potato growing area. Qualifying potatoes grown in the restricted seed potato growing area must be certified as seed potatoes. A grower who seeks to plant potatoes in the restricted seed potato growing area and who does not intend to have the potatoes certified as seed potatoes must meet the following requirements:~~

(1) seed potatoes planted in the restricted seed potato growing area must have been certified before planting. For seed potatoes to be certified, the seed potatoes must meet the standards of this chapter or the standards of a certification program of another state or

92.1 province that, in the judgment of the commissioner, provides equivalent assurances of seed
92.2 potato quality;

92.3 (2) certification documentation for all lots planted on a farm must be filed with the
92.4 Department of Agriculture;

92.5 (3) planted lots must meet tolerances for certified class seed potatoes; and

92.6 (4) the potato plants must be inspected by the commissioner during a site visit.

92.7 (b) The commissioner may enter and inspect plots subject to paragraph (a) during the
92.8 growing season.

92.9 (c) Potatoes grown in the restricted seed potato growing area that have not met the
92.10 requirements for certification must not be labeled, marketed, or sold as certified seed potatoes.

92.11 (d) If, in any year, a sufficient volume of potato seed that meets certification standards
92.12 related to disease, in any or all varieties, is not available to be planted in Minnesota, the
92.13 commissioner may, upon application by one or more growers, permit potato seed that does
92.14 not comply with this section to be planted for that growing season if the seed does not pose
92.15 a serious threat of disease to the public.

92.16 Sec. 24. **[21.123] SEED POTATO CERTIFICATION.**

92.17 Subdivision 1. **Eligibility.** In order to produce certified seed potatoes, a grower must
92.18 comply with the following requirements:

92.19 (1) a grower must ensure that potatoes meet the tolerances prescribed by this chapter
92.20 and the potatoes have been inspected by the commissioner while growing in a field;

92.21 (2) a grower must ensure that all potatoes planted on the grower's farm have been entered
92.22 for certification by the commissioner;

92.23 (3) a grower must ensure that each lot is grown while physically separated from other
92.24 lots. Markers must be visible to an inspector from anywhere in the area of separation;

92.25 (4) a grower must submit an application for certification before June 16 each year on
92.26 forms provided by the commissioner. The commissioner must charge a ten percent late
92.27 registration fee to a grower who submitted an application postmarked after June 15 and
92.28 before July 1. The commissioner may extend the deadline due to special circumstances,
92.29 such as a natural disaster, that make it impractical or impossible for planting to be completed
92.30 by the deadline and that affect an area or large number of growers. A grower must make a
92.31 request for an extension in writing before June 16;

(5) an application for certification must include a North American Health Certificate and a shipping point certificate, bulk seed certificate, or certificate of origin. The commissioner must not accept an incomplete application for certification;

(6) an application for recertification must demonstrate that the seed potatoes being entered for recertification originated from a class system in Minnesota or another state or province under the supervision of another certifying agency; and

(7) a grower must comply with sections 21.111 to 21.125. A grower's violation of sections 21.111 to 21.125 is cause for the commissioner to reject the grower's field or lot. A grower must not sell or label potatoes as certified seed potatoes when the potatoes were grown in a rejected field or lot.

Subd. 2. **Certification process.** (a) As part of the certification process, the commissioner must visually inspect sample plants and tubers from each field and lot belonging to the grower, except that the commissioner is not required to visually inspect sample plants and tubers when certifying prenuclear class potatoes.

(b) For seed potato varieties that do not exhibit visible symptoms of a specific pathogen, the commissioner must subject the seed potatoes to laboratory tests to determine the level of a pathogen in a seed lot. Testing under this paragraph may occur during the growing season, the storage season, or winter testing.

(c) The commissioner must not accept an application for certification from a grower in a community or county without sufficient acreage for total inspection fee charges to cover the cost of wages and expenses of the commissioner to complete an inspection. The commissioner must make a determination of sufficient acreage under this paragraph before conducting an inspection as part of the certification process.

(d) The commissioner must not inspect a field for certification unless both the planted seed potato variety and the particular planted lot have been authorized by the commissioner. When considering the authorization of a particular seed potato variety for planting as certified seed potatoes, the commissioner must consider scientific evidence and the expert opinions of inspectors.

(e) The following classes of seed potatoes are eligible for planting as certified seed potatoes: Prenuclear (PN), Generation 1 (G1), Generation 2 (G2), Generation 3 (G3), Generation 4 (G4), Generation 5 (G5), and experimental class seed potatoes. The commissioner may authorize the planting of Certified (C) class or Generation 6 (G6) class seed potatoes if the commissioner determines that the seeds do not pose a serious threat of disease to the public.

94.1 Subd. 3. **Bacterial ring rot or potato spindle tuber viroid.** If the commissioner finds
94.2 the presence of bacterial ring rot or potato spindle tuber viroid in a field or lot, the
94.3 commissioner must reject the entire field or lot. If the commissioner discovers a single plant
94.4 in a field or a tuber in storage that is infected with bacterial ring rot or potato spindle tuber
94.5 viroid, the commissioner must reject the entire field or lot where the plant was grown. If
94.6 the commissioner has not found bacterial ring rot or potato spindle tuber viroid in a field
94.7 or lot, the field or lot is not necessarily free from either disease.

94.8 Subd. 4. **Winter testing.** (a) In order to detect certain virus diseases, the commissioner
94.9 must conduct winter testing of a sample from each class seeking eligibility for recertification,
94.10 except PN, G1, and experimental classes. The commissioner must grow out and visually
94.11 inspect a representative sample of tubers from each seed lot for stand, vigor, varietal purity,
94.12 and disease. If, during a visual inspection, a plant shows signs of potato virus Y or potato
94.13 leafroll virus, or if the plant is of a variety that does not express visual symptoms of infection,
94.14 the commissioner must ensure that a sample of the plant is lab tested for potato virus Y and
94.15 potato leafroll virus. The commissioner must determine whether a field or lot contains the
94.16 threshold amount of disease permitted under section 21.124, subdivision 9. The commissioner
94.17 must include any lot that passes winter testing in the approved list of certified seed lots
94.18 eligible for recertification.

94.19 (b) If the commissioner determines that a winter test of a lot or field has a serious
94.20 malfunction, the commissioner must base classification of the lot or field on summer field
94.21 readings from the previous year or lab testing.

94.22 (c) Instead of winter testing a sample of winter grow out, the commissioner may accept
94.23 comprehensive lab testing if the commissioner determines that special circumstances exist,
94.24 such as a natural disaster, that would make submission of samples for inclusion in winter
94.25 testing impractical or impossible.

94.26 (d) The commissioner must reject a field or lot if the commissioner determines that a
94.27 large number of plants are missing from the field or lot due to disease.

94.28 (e) The commissioner must reject a field or lot if the commissioner determines that the
94.29 field or lot contains a large number of weak plants.

94.30 (f) The commissioner may reject a field or lot if the field or lot contains a large number
94.31 of plants that have a mixture of variety.

94.32 Subd. 5. **Seed potato certification classes.** Seed potato certification classes must be
94.33 differentiated by the potatoes' compliance with disease tolerances, varietal purity, and seed

95.1 origin. Seed potato certification classes are: Prenuclear, Generation 1, Generation 2,
95.2 Generation 3, Generation 4, Generation 5, Generation 6, and Certified.

95.3 Subd. 6. **Experimental status.** (a) Lots from a breeder's seed that have not been tested
95.4 and have not been determined to be virus-free are considered experimental. The commissioner
95.5 must designate seedlings or numbered selections in experimental status as a class and
95.6 determine requirements of that class.

95.7 (b) To obtain experimental status under this subdivision, an applicant must submit a
95.8 written statement from the seedlings' or numbered selections' breeder, originator, or
95.9 originator's designee verifying that the applicant has full and unrestricted rights to introduce
95.10 the seedlings or numbered selections into the commercial market and that the applicant may
95.11 apply to enter the seedlings or numbered selections into the certification system. The written
95.12 statement must accompany the certification application submitted by the applicant.

95.13 (c) After reviewing the applicant's written statement and certification application, the
95.14 commissioner may designate seedlings or numbered selections described in the application
95.15 as having experimental status.

95.16 (d) After an applicant is notified by the commissioner that the seedlings or numbered
95.17 selections have experimental status, the applicant must ensure that the seedlings or numbered
95.18 selections are tagged with the word "EXPERIMENTAL."

95.19 Subd. 7. **Protected varieties.** If an applicant seeks to enter a seed potato variety protected
95.20 under the Plant Variety Protection Act Amendments of 1994 into the certification system,
95.21 the applicant must submit a written statement from the breeder, originator, or originator's
95.22 designee that the applicant has full and unrestricted rights to introduce the protected variety
95.23 into the certification system. The applicant must ensure that the written statement
95.24 accompanies the certification application for any protected seed potato variety.

95.25 Subd. 8. **Certification factors; field inspection.** (a) The commissioner must consider
95.26 the following factors when conducting a field inspection pursuant to a certification
95.27 application:

95.28 (1) the commissioner must reject a field or lot if a large number of plants are missing
95.29 due to disease;

95.30 (2) the commissioner must reject a field or lot if the field or lot contains a large number
95.31 of weak plants;

95.32 (3) the commissioner must inspect a field or lot for bacterial ring rot. The commissioner
95.33 must reject a field or lot if the commissioner finds the presence of bacterial ring rot. If

96.1 bacterial ring rot is present in a field or lot, the remaining crop is not eligible for certification
96.2 planting;

96.3 (4) the commissioner must reject a field or lot if the field or lot contains potatoes with
96.4 a level of disease higher than the acceptable tolerance for the disease for the potatoes' seed
96.5 potato certification class according to section 21.124, subdivision 9;

96.6 (5) the commissioner must reject a field or lot if the field or lot contains a percentage
96.7 of diseased plants that exceeds the acceptable percentage of disease listed in section 21.124
96.8 for the seed potato certification class;

96.9 (6) the commissioner must reject a field or lot if any of the following are present in the
96.10 field or lot to such an extent that the commissioner is unable to complete a satisfactory
96.11 inspection for diseases: early or late blight, blackleg or wilt of any kind, weeds, plant injury
96.12 from insects, or chemical damage; and

96.13 (7) the commissioner must reject a field or lot if any other conditions are present to such
96.14 an extent that the commissioner is unable to make a satisfactory inspection for diseases.

96.15 (b) The commissioner must determine that a field is ineligible for certification if cull
96.16 piles are in such close vicinity to the field that it is likely that the field is contaminated.

96.17 (c) The commissioner must make at least two field inspections of a field during the
96.18 growing season. The commissioner must conduct a final inspection of a field for bacterial
96.19 ring rot during the time of year that symptoms of bacterial ring rot are most likely to be
96.20 observed. If the commissioner is unable to conduct a final inspection under this paragraph
96.21 due to management practices of the grower or for a reason that is out of the grower's control,
96.22 such as a natural disaster, the grower must ensure that laboratory testing is conducted to
96.23 maintain eligibility for certification. An additional inspection or additional laboratory testing
96.24 may be necessary to meet phytosanitary requirements in established markets in another state
96.25 or in a Canadian province.

96.26 Subd. 9. **Roguing.** If any of the diseases listed in section 21.124, subdivision 1, are
96.27 present in a field in amounts greater than the maximum disease tolerance level, the grower
96.28 must rogue the field and remove the infected plants before the final inspection by the
96.29 commissioner. If a grower has completed roguing a field after tubers have formed, the
96.30 grower must remove and destroy all tubers from rogued plants.

96.31 Subd. 10. **Storage.** (a) A grower must ensure that a lot is stored under conditions that
96.32 prevent disease contamination. A grower must not store a lot in any warehouse where other
96.33 potatoes are stored, unless the grower labels the lot according to paragraph (b).

97.1 (b) If more than one grower stores lots in the same warehouse, each grower must identify
97.2 the grower's lots by labeling the bin containing the lot with the grower's name, the grower's
97.3 address, the variety of potatoes in the bin, and the number of potatoes in the bin.

97.4 (c) If a grower plans to store a lot in a public warehouse or storage unit that is not directly
97.5 under the grower's control, the grower must send a complete record of storage to the
97.6 commissioner prior to storing the lot. The record must include the address and location of
97.7 the public warehouse or storage unit, the variety of potatoes in each bin, and the number of
97.8 potatoes in each bin. If a warehouse receipt for the lot is available, the grower must submit
97.9 a copy of the warehouse receipt to the commissioner. If more than one grower stores lots
97.10 in the same public warehouse or storage unit, the grower must label each lot according to
97.11 paragraph (b).

97.12 (d) A grower must not use the same equipment for grading and handling lots of certified
97.13 seed potatoes and other potatoes. If a grower has used the same equipment for grading and
97.14 handling certified seed potatoes and other potatoes, the commissioner must reject the grower's
97.15 lots.

97.16 (e) A firm that handles lots under contract must label each bin containing a lot with the
97.17 name of the grower whose lots are being stored. A firm handling lots under contract must
97.18 properly label and handle bins containing lots. A certification tag or bulk certificate must
97.19 not be issued unless all bins are properly labeled according to this paragraph.

97.20 (f) By November 1 of each crop year, a grower must submit to the commissioner a
97.21 completed storage and yield report for each lot on a form prescribed by the commissioner.
97.22 The commissioner may extend the deadline after November 1 due to special circumstances,
97.23 such as a natural disaster, that would make it impractical or impossible for a grower to
97.24 complete harvesting and storage by November 1 and that affect an area or a large number
97.25 of growers. A grower must submit a written request for an extension to the commissioner
97.26 before November 1 of the crop year for which the extension is sought.

97.27 Subd. 11. **Tags; bulk certificates.** (a) Once the commissioner has informed a grower
97.28 that the grower's potatoes meet the certification requirements in sections 21.111 to 21.125,
97.29 a grower may tag the potatoes using an approved tag indicating the grade of potatoes as
97.30 blue-tag-certified seed potato grade, yellow-tag-certified seed potato grade, or
97.31 white-tag-certified seed potato grade. A grower's name, the city where the farm is located,
97.32 the potato variety, and the crop year must be printed on a tag under this subdivision.

97.33 (b) When fastening a tag to a potato sack, a grower must fasten the tag to the sack to
97.34 form a seal at the time that the lot is prepared for shipment.

98.1 (c) A bulk certificate must include the date that the certificate was issued, class, grade,
98.2 lot number, and approximate weight of the lot.

98.3 (d) If a grower wishes to tag the grower's own potatoes, the grower must order the tags
98.4 for the grower's own potatoes.

98.5 (e) A grower may print a tag for potatoes if the grower has provided proof of each lot
98.6 to the commissioner for review before using the tag. A tag printed by a grower must contain
98.7 the following statement: "The quality and condition of each lot is only confirmed through
98.8 a shipping point inspection certificate. This tag, without an accompanying shipping point
98.9 inspection certificate, is not proof that the potatoes contained within have been duly
98.10 inspected."

98.11 Subd. 12. **Certified seed potato grades.** Certified seed potatoes must be classified by
98.12 certified seed potato grades based on the number of physical defects of tubers. A grower
98.13 must only use a certified seed potato grade for potatoes after a shipping point inspection of
98.14 the potatoes has been completed. The following three grades of certified seed potatoes must
98.15 be used for Minnesota-certified seed potatoes:

98.16 (1) the blue-tag-certified seed potato grade is the first grade of certified seed potatoes.
98.17 The blue-tag-certified seed potato grade is stricter than other grades. The blue-tag-certified
98.18 seed potato grade does not allow as many physical defects of tubers as other grades. A
98.19 grower may use the blue-tag-certified seed potato grade for intrastate and interstate shipments
98.20 of certified seed potatoes.

98.21 (2) the yellow-tag-certified seed potato grade is the second grade of certified seed
98.22 potatoes. The yellow-tag-certified seed potato grade allows more physical defects of tubers
98.23 than the blue-tag-certified seed potato grade. A grower may use the yellow-tag-certified
98.24 seed potato grade for intrastate and interstate shipments of certified seed potatoes; and

98.25 (3) the white-tag-certified seed potato grade is the third grade of certified seed potatoes.
98.26 The number of physical defects that the white-tag-certified seed potato grade allows is
98.27 determined by an agreement between the purchaser and seller of the certified seed potatoes.
98.28 A grower may use the white-tag-certified seed potato grade for intrastate and interstate
98.29 shipments of certified seed potatoes.

98.30 Subd. 13. **Grading.** (a) A grower must ensure that a lot is inspected at the shipping point
98.31 if the lot requires a grade statement.

98.32 (b) If an inspection at the shipping point is impossible, a grower must request a grading
98.33 inspection in transit.

99.1 (c) A grower must ensure that a bagged lot or shipment offered for sale and tagged with
99.2 approved certification tags is contained in new even-weight sacks.

99.3 (d) A grower must ensure that a bulk shipment is identified with a bulk certificate.

99.4 (e) A grower must ensure that a bagged lot and bulk lot or shipment meets grade standards
99.5 in section 21.125.

99.6 (f) A grower must recondition a lot or shipment that fails to meet the grade standards in
99.7 section 21.125.

99.8 (1) If a lot or shipment fails to meet grade standards and is contained in sacks, a grower
99.9 must remove approved certification tags from the lot or shipment before the lot or shipment
99.10 may proceed to its destination.

99.11 (2) If a shipment is in bulk and fails to meet grade standards in section 21.125, a bulk
99.12 certificate must not be issued.

99.13 (g) If a lot or shipment fails to meet grade standards, the shipper must bear the costs of
99.14 reconditioning potatoes to meet the grade standards in section 21.125.

99.15 Sec. 25. **[21.124] REQUIREMENTS FOR PRODUCTION OF DIFFERENT**
99.16 **CLASSES OF CERTIFIED SEED POTATOES.**

99.17 Subdivision 1. **Prenuclear class certified seed potatoes.** (a) A lot grown as and intended
99.18 to be prenuclear class certified seed potatoes must be grown from plants tested and shown
99.19 to be free from the following pathogens:

99.20 (1) *Clavibacter michiganensis* ssp. *sepedonicus* (ring rot);

99.21 (2) *Pectobacterium atrosepticum* ssp. *Atrosepticum*, *carotovora* (blackleg);

99.22 (3) potato virus X;

99.23 (4) potato virus S;

99.24 (5) potato virus A;

99.25 (6) potato virus M;

99.26 (7) potato virus Y;

99.27 (8) potato spindle tuber viroid; and

99.28 (9) potato leafroll virus.

99.29 (b) When growing prenuclear class seed potatoes, a grower must ensure that each explant
99.30 or tuber is tested for organisms for which testing is required by the state or province of

100.1 destination. A grower must ensure that material in maintenance is tested during the year of
100.2 producing prenuclear class seed potatoes.

100.3 (c) A grower must produce prenuclear class seed potatoes in a greenhouse or screenhouse
100.4 under sanitary conditions, free from insects and weeds that can harbor or transmit potato
100.5 diseases or other conditions that would allow possible disease contamination. A grower
100.6 must ensure that a facility used for growing prenuclear seed potatoes is sufficiently insulated
100.7 from insects by screens and double doors. The commissioner may inspect any facility or
100.8 equipment used for growing, handling, and storing prenuclear class seed potatoes to verify
100.9 that the facility or equipment complies with this paragraph.

100.10 (d) A grower must ensure that one percent of each lot or ten plants or tubers from each
100.11 lot, whichever is greater, is tested during the growing season to verify that the crop is free
100.12 from potato virus X, potato virus Y, potato leafroll virus, *C. michiganensis*, and *P.*
100.13 *atrosepticum*.

100.14 (e) Prenuclear tubers may originate from greenhouse tubers for one year only if the
100.15 greenhouse tubers have remained at the same growing operation and have remained isolated
100.16 from field-grown tubers.

100.17 (f) Prenuclear class certified seed potatoes must not contain more than the allowable
100.18 tolerances for disease and varietal mixture in subdivision 9.

100.19 Subd. 2. **Generation 1 class certified seed potatoes.** (a) Generation 1 class seed potatoes
100.20 must meet the following requirements:

100.21 (1) the seed source must be either prenuclear tubers, clones, or plantlets; and

100.22 (2) tubers or plantlets must be planted in identifiable family units.

100.23 (b) Lots in Generation 1 class may be exempt from winter testing requirements if leaves
100.24 collected during the growing season are laboratory tested and shown to be within the
100.25 allowable tolerance of potato virus X, potato virus Y, and other pathogens identified by the
100.26 commissioner.

100.27 (c) Each lot must be stored in an individual identifiable unit.

100.28 (d) Generation 1 seed potatoes must not contain more than the allowable tolerances for
100.29 disease and varietal mixture for seed potatoes in subdivision 9.

100.30 Subd. 3. **Generation 2 class certified seed potatoes.** Generation 2 class seed potatoes
100.31 must originate from Generation 1 class seed potatoes. Generation 2 class seed potatoes must

101.1 not contain more than the allowable tolerances of disease and varietal mixture in subdivision

101.2 9.

101.3 Subd. 4. **Generation 3 class certified seed potatoes.** Generation 3 class seed potatoes

101.4 must originate from Generation 2 class seed potatoes. Generation 3 class seed potatoes must

101.5 not contain more than the allowable tolerances of disease and varietal mixture in subdivision

101.6 9.

101.7 Subd. 5. **Generation 4 class certified seed potatoes.** Generation 4 class seed potatoes

101.8 must originate from Generation 3 class seed potatoes. Generation 4 class seed potatoes must

101.9 not contain more than the allowable tolerances for disease and varietal mixture in subdivision

101.10 9.

101.11 Subd. 6. **Generation 5 class certified seed potatoes.** Generation 5 class seed potatoes

101.12 must originate from Generation 4 class seed potatoes. Generation 5 class seed potatoes must

101.13 not contain more than the allowable tolerances for disease and varietal mixture in subdivision

101.14 9.

101.15 Subd. 7. **Generation 6 class certified seed potatoes.** Generation 6 class seed potatoes

101.16 must originate from Generation 5 class seed potatoes. Generation 6 class seed potatoes must

101.17 not contain more than the allowable tolerances for disease and varietal mixture in subdivision

101.18 9.

101.19 Subd. 8. **Certified class certified seed potatoes.** Certified class seed potatoes must

101.20 originate from generation classes of seed potatoes. Certified class seed potatoes must not

101.21 contain more than the allowable tolerances for disease and varietal mixture in subdivision

101.22 9.

101.23 Subd. 9. **Allowable tolerances for diseases and varietal mixture by generation**

101.24 **class.** The numbers represent the percentage of potatoes that may be affected out of an

101.25 individual lot.

102.10 Sec. 26. [21.125] MINNESOTA CERTIFIED SEED POTATO GRADES AND

102.11 TOLERANCES.

102.12 Subdivision 1. Certified seed potato grading. Potatoes must meet the requirements of

102.13 sections 21.111 to 21.125 to be graded as certified seed potatoes.

102.14 Subd. 2. Definitions. (a) For the purposes of this section, the following terms have the

102.15 meanings given.

102.16 (b) "Damage" means any defect or combination of defects that materially affects the

102.17 appearance of the individual potato, or that cannot be removed without a loss of more than

102.18 five percent of the total weight of the potato, including the peel covering the defective area.

102.19 (c) "Diameter" means the greatest dimension at right angles to the longitudinal axis.

102.20 Diameter means the long axis.

102.21 (d) "Dry rot" means decaying tissue that is dry.

102.22 (e) "Fairly clean" means that the individual potato is reasonably free from dirt, staining,

102.23 or other foreign matter.

102.24 (f) "Fairly well-shaped" means that the individual potato is not materially pointed,

102.25 dumbbell-shaped, or otherwise ill-formed.

102.26 (g) "Mature" means that the outer skin does not loosen or feather readily during the

102.27 ordinary methods of handling.

102.28 (h) "Serious damage" means any defect or combination of defects that seriously affects

102.29 the appearance of the individual potato or that cannot be removed without a loss of more

102.30 than ten percent of the total weight of the potato, including the peel covering the defective

102.31 area.

102.32 (i) "Slightly dirty" means the appearance is not materially affected by dirt, staining, or

102.33 other foreign matter.

103.1 (j) "Soft rot" or "wet breakdown" means any soft, mushy, or leaky condition of potato
103.2 tissues.

103.3 (k) "Well-shaped" means the normal shape for a variety.

103.4 Subd. 3. **Damage.** The commissioner must find that one or more of the following defects
103.5 constitutes damage:

103.6 (1) a russet scab that materially detracts from the appearance of a potato;

103.7 (2) second growth or growth cracks that materially affect the appearance of an individual
103.8 potato;

103.9 (3) air cracks when removal of the air cracks causes a loss of more than five percent of
103.10 the total weight of a potato;

103.11 (4) a potato that is more than moderately shriveled, spongy, or flabby;

103.12 (5) an individual potato that has sprouts over one inch in length;

103.13 (6) a surface scab, powdery scab, or pitted scab that covers more than five percent of
103.14 the surface of a potato or a surface scab, powdery scab, or pitted scab that, when removed,
103.15 causes a potato to lose more than five percent of the potato's total weight, including peel
103.16 covering a defective area of the potato; or

103.17 (7) more than 50 percent of a potato's surface contains scattered, lightly caked soil or
103.18 more than 15 percent of a potato's surface is badly caked with soil.

103.19 Subd. 4. **Serious damage.** The commissioner must find that one or more of the following
103.20 defects constitutes serious damage:

103.21 (1) a russet scab that seriously detracts from the appearance of a potato;

103.22 (2) the appearance of a potato is seriously affected by caked or smeared dirt or other
103.23 foreign matter;

103.24 (3) both ends of a potato are cut or clipped, more than an estimated one-fourth of a potato
103.25 is cut away from one end, or a remaining portion of a clipped potato weighs less than six
103.26 ounces;

103.27 (4) one or more cuts that seriously affect the appearance of a potato or that cannot be
103.28 removed without the loss of more than ten percent of a potato's total weight, including peel
103.29 covering the defective area;

103.30 (5) a potato that is excessively shriveled, spongy, or flabby;

104.1 (6) a surface scab, powdery scab, or pitted scab that covers more than 25 percent of the
 104.2 surface of a potato or a surface scab, powdery scab, or pitted scab that, when removed,
 104.3 causes a loss of more than ten percent of a potato's total weight, including peel covering the
 104.4 defective area; or

104.5 (7) wireworm or air cracks that, when removed, cause a loss of more than ten percent
 104.6 of a potato's total weight.

104.7 Subd. 5. **Application of tolerance.** If the average of an entire lot is within the disease
 104.8 tolerances specified for the grade in section 21.124, subdivision 9, an individual container
 104.9 in the lot may contain no more than double the disease tolerance specified in section 21.124,
 104.10 subdivision 9, except that sprouts, at least one defective specimen with a defect other than
 104.11 bacterial ring rot, and one off size specimen is permitted. This subdivision does not apply
 104.12 to bulk conveyances.

104.13 Subd. 6. **Condition after transit.** Deterioration that developed in transit must affect the
 104.14 condition of potatoes. Deterioration that developed in transit must not affect the grade of
 104.15 potatoes.

104.16 Subd. 7. **Minnesota blue-tag-certified seed potato grade.** (a) To be graded as Minnesota
 104.17 blue-tag-certified seed potatoes, potatoes must meet the following requirements:

104.18 (1) at the time of the shipping point inspection, potatoes must be of one variety;
 104.19 unwashed; fairly well-shaped; free from bacterial ring rot, late blight, freezing, black heart,
 104.20 and soft rot or wet breakdown; free from damage caused by soil or other foreign matter,
 104.21 second growth, air cracks, cuts, shriveling, sprouts, pitted scabs, surface scabs, powdery
 104.22 scabs, russet scabs, dry rot, other diseases, insects or worms, mechanical or other means,
 104.23 or flattened or depressed areas with underlying flesh discoloration; and free from serious
 104.24 damage caused by hollow heart, wireworm, growth cracks, or internal discoloration other
 104.25 than hollow heart. Sunburn and silver scurf must not be considered factors that affect the
 104.26 grading of potatoes. This clause does not apply to hollow heart if the potatoes are labeled
 104.27 "hollow heart exempt" on the affixed tag or accompanying certificate; and

104.28 (2) for round or intermediate shaped varieties, the maximum potato size is 12 ounces
 104.29 (340.2 grams) and, unless otherwise specified, the minimum size must not be less than 1-1/2
 104.30 inches (38.1 millimeters) in diameter. For long varieties, the maximum size is 14 ounces
 104.31 (396.9 grams) and, unless otherwise specified, the minimum size must not be less than 1-1/2
 104.32 inches (38.1 millimeters) in diameter. For all varieties, the minimum diameter for size "B"
 104.33 must not be less than 1-1/2 inches (38.1 millimeters) and the maximum size must not be
 104.34 more than 2-1/4 inches (57.1 millimeters) in diameter. The department may grade potatoes

105.1 that do not meet the maximum and minimum size specifications as Minnesota
105.2 blue-tag-certified seed potatoes if the buyer agrees to accept potatoes of alternate size
105.3 specifications from the grower and the specifications are listed on the affixed tag or
105.4 accompanying bulk certificate issued by the department.

105.5 (b) To allow for variations incident to proper grading and handling, the following lot
105.6 tolerances are permitted:

105.7 (1) for defects:

105.8 (i) up to ten percent of a lot may be seriously damaged by hollow heart, unless labeled
105.9 "hollow heart exempt" on the affixed tag or accompanying certificate;

105.10 (ii) up to five percent of a lot may be seriously damaged by internal discoloration due
105.11 to causes other than hollow heart;

105.12 (iii) up to ten percent of a lot may be damaged by soil or other foreign matter;

105.13 (iv) up to 20 percent of a lot may be damaged by sprouts;

105.14 (v) up to ten percent of a lot may be seriously damaged by wireworm;

105.15 (vi) for potatoes that fail to meet the remaining requirements of the potatoes' grade, a
105.16 lot may contain up to a total of six percent of the following defects combined and must not
105.17 contain more than the following percentage of defects:

105.18 (A) soft rot, frozen, or wet breakdown, 0.5 percent;

105.19 (B) damage by surface scab, powdery scab, or pitted scab, 2.0 percent;

105.20 (C) damage by dry rot, 2.0 percent, of which not more than 1.0 percent is late blight
105.21 tuber rot;

105.22 (D) bacterial ring rot, 0.0 percent; and

105.23 (E) late blight tuber rot, 1.0 percent; and

105.24 (vii) the presence of the following does not affect seed quality and must not be scored
105.25 against the potatoes' grade:

105.26 (A) brown discoloration following skinning;

105.27 (B) dried stems;

105.28 (C) flattened or depressed areas showing no underlying flesh discoloration;

105.29 (D) greening;

105.30 (E) sunburn;

106.1 (F) skin checks; and

106.2 (G) silver scurf; and

106.3 (2) for off size:

106.4 (i) up to five percent of potatoes may fail to meet the required or specified minimum
106.5 size; and

106.6 (ii) up to ten percent of potatoes may fail to meet the required maximum size.

106.7 Subd. 8. **Minnesota yellow-tag-certified seed potato grade.** (a) To be graded as
106.8 Minnesota yellow-tag-certified seed potatoes, potatoes must meet the following requirements:

106.9 (1) at the time of the shipping point inspection, the potatoes must be of one variety;
106.10 unwashed; fairly well-shaped; free from bacterial ring rot, late blight, freezing, black heart,
106.11 and soft rot or wet breakdown; free from damage caused by second growth, air cracks, cuts,
106.12 shriveling, pitted scabs, surface scabs, powdery scabs, dry rot, other diseases, insects or
106.13 worms, or mechanical means or other means; and free from serious damage caused by soil
106.14 or other foreign matter, hollow heart, wireworm, growth cracks, russet scabs, or internal
106.15 discoloration other than hollow heart. Sunburn and silver scurf must not be considered
106.16 factors that affect the grading of potatoes. This clause does not apply to hollow heart if
106.17 labeled "hollow heart exempt" on the affixed tag or accompanying certificate; and

106.18 (2) for all varieties, the maximum potato size is 14 ounces (396.9 grams) and the
106.19 minimum size is 1-1/2 inch (38.1 millimeter) in diameter. For all varieties, the minimum
106.20 diameter for size "B" must not be less than 1-1/2 inches (38.1 millimeters) and the maximum
106.21 diameter must not be more than 2-1/4 inches (57.1 millimeters). The department may grade
106.22 potatoes that do not meet the maximum and minimum size specifications as Minnesota
106.23 yellow-tag-certified seed potatoes if the buyer agrees to accept potatoes with alternate size
106.24 specifications from the grower and the size specifications are listed on the affixed tag or
106.25 accompanying bulk certificate issued by the department.

106.26 (b) To allow for variations incident to proper grading and handling, the following lot
106.27 tolerances are permitted:

106.28 (1) for defects:

106.29 (i) up to 20 percent of potatoes may be seriously damaged by hollow heart, unless labeled
106.30 "hollow heart exempt" on the affixed tag or accompanying certificate;

106.31 (ii) up to five percent of potatoes may be seriously damaged by internal discoloration
106.32 due to a cause other than hollow heart;

109.1 Under this permit category, the fees for the following kinds of agricultural seed sold either
109.2 in bulk or containers are:

109.15 transferred to the shipper. An application for a transfer of this responsibility must be made

A \$15 penalty must be charged when the semiannual report is late, even if no fee is due for the reporting period. Seed fee permits may be revoked for failure to comply with the applicable provisions of this paragraph or the Minnesota seed law.

If the executive director of the Board of Animal Health, after investigation, has determined that rabies exists in any territory in the state, similar proclamations must be issued in all towns and cities within the territory or area in which it is necessary to control the outbreak and prevent the spread of the disease. The proclamation must prohibit the owner or custodian of any dog within the designated territory from permitting or allowing the dog to be at large within the territory unless the dog is effectively muzzled so that it cannot bite any other animal or person.

All local peace officers and community health boards shall enforce sections 35.67 to 35.69.

The report shall include information about the impacts of the biodiesel mandate on the development of biodiesel production capacity in the state, and on the use of feedstock grown or raised in the state for biodiesel production. The report must include any written comments received from members of the biodiesel fuel task force by January 1 of that year designated by them for inclusion in the report.

(b) The commissioner of agriculture, in consultation with the commissioner of commerce and the Biodiesel Fuel Task Force, shall study the need to continue the exceptions in subdivision 3. 1510.2300 AUTHORITY.

Parts 1510.2300 to 1510.2355 provide standards for the inspection, certification, production, and marketing of certified seed potatoes in the state of Minnesota. The authority to adopt these rules is contained in Minnesota Statutes, section 21.118.

1510.2305 DEFINITIONS.

Subpart 1. **General.** As used in parts 1510.2300 to 1510.2355, the following definitions apply unless the context clearly indicates otherwise.

Subp. 2. **Certified.** "Certified" has the meaning given it in Minnesota Statutes, section 21.111, subdivision 3.

Subp. 3. **Certified seed potatoes.** "Certified seed potatoes" means potatoes which have been produced, graded, sacked or placed in bulk, and inspected and certified in accordance with parts 1510.2300 to 1510.2355.

Subp. 3a. **Class.** "Class" means the seed quality level as it relates to compliance with the specified tolerances for diseases and varietal purity.

Subp. 3b. **Clone.** "Clone" means a unit of seed potatoes, being the progeny of one plant, which has been tested to become eligible to produce Primary Foundation 1 seed potatoes.

Subp. 7. **Farm.** "Farm" means a seed potato enterprise. It includes all land, equipment, storage facilities, and laborers used to produce certified seed potatoes.

Subp. 8. **Field.** "Field" means a plot of land on a farm on which potatoes are grown for certification. The potatoes shall be of one variety from one certified seed potato growing operation and shall be grown in physical separation from other fields.

Subp. 9. **Inspected.** "Inspected" has the meaning given it in Minnesota Statutes, section 21.111, subdivision 2.

Subp. 10. **Lot.** "Lot" means a group of seed potatoes entered for certification that have passed the field inspection requirements. For the purposes of parts 1510.2300 to 1510.2355, a lot of potatoes also means that the group is of one variety, from one or more fields, grown on the same farm, and stored in physical separation from other lots.

Subp. 10a. **Material in maintenance.** "Material in maintenance" means propagative material, plantlets, or tubers that are maintained, not multiplied under controlled laboratory conditions.

Subp. 10b. **Physical separation.** "Physical separation" means separated by at least the width of one row, or markings such as flags that are at every corner of the lot or at least 100 yards apart, whichever is less. The markings must be visible to the inspector from anywhere on the separation.

Subp. 15. **Tuber unit.** "Tuber unit" means the separate pieces of one tuber that are planted consecutively in two or more hills in a row.

1510.2310 GENERAL GUIDANCE.

Subpart 1. **Scope.** The provisions of this part govern the production of potatoes for use as certified seed potatoes.

Subp. 2. **Seed potato certification.** In order to produce certified seed potatoes, a grower must comply with the following procedures:

A. Potatoes entered for certification shall be inspected while growing in the field and again after harvest at the time of shipment. Certification shall be based upon visual inspection by the commissioner of sample plants and tubers from each field and lot, or for varieties that do not express visible symptoms of a specific pathogen, seed potatoes must be subjected to laboratory tests to determine the level of the pathogen in a seed lot. This testing may occur during the growing season, storage season, or winter testing. Certificates shall be issued to show the varietal purity, freedom from disease, and physical defects of the potatoes at the time of inspection.

B. Participation in the certified seed potato program shall be voluntary. The applicant may withdraw at any time. Farming and sanitation practices are the responsibility of the applicant. Certification and inspection under parts 1510.2300 to 1510.2355 shall be conducted by the commissioner. Failure of the applicant to comply with the requirements of parts 1510.2300 to 1510.2355 shall be cause for rejection of any field or lot. Potatoes from rejected fields or lots cannot be sold as certified seed potatoes.

Subp. 3. **Winter testing.** In order to detect certain virus diseases, samples from all classes as defined in parts 1510.2325 and 1510.2330 shall be winter tested. In the event of serious malfunctions of the winter test, classification of lots in the certified classes must be based on the previous summer field readings.

Subp. 4. **Certified seed potato classes.** Seed potato certification classes are differentiated by their compliance level with disease tolerances and varietal purity. The origin of the seed also determines the class. The classes, according to their origin, in the generation system in descending order are: Prenuclear (PN), Generation 1 (G1), Generation 2 (G2), Generation 3 (G3), Generation 4 (G4), Generation 5 (G5), and Generation 6 (G6). Equivalent to this in the clonal system in descending order are: Primary Foundation 1 (PF1), Primary Foundation 2 (PF2), Foundation 1 (F1), Foundation 2 (F2), and Certified (C).

Subp. 5. **Certified seed potato grades.** Grades of certified seed potatoes are established according to the physical defects of the tubers. There are three grades used for shipping Minnesota certified seed potatoes.

A. The blue tag certified seed potato grade, the first grade, has tolerances for physical defects of the tubers stricter than the other grades. This grade may be used by growers of Primary Foundation certified, Foundation certified, Generation certified, and Certified seed potatoes. The blue tag grade may be used for intrastate and interstate shipments of certified seed potatoes.

B. The yellow tag certified seed potato grade is the second grade. This grade allows more physical defects of the tubers than the blue tag certified seed potato grade. It may be used by growers of Primary Foundation certified, Foundation certified, Generation certified, and Certified seed potatoes. The yellow tag grade may also be used for intrastate and interstate shipments of certified seed potatoes.

C. The white tag certified seed potato grade is the third grade. The tolerances for physical defects of the tubers are determined by agreement between purchaser and seller of the certified seed potatoes. It may only be used for intrastate and interstate shipments of certified seed potatoes.

Subp. 6. **Zero tolerance for bacterial ring rot and potato spindle tuber viroid.** Certification rules make provisions to allow the presence of certain diseases at levels sufficiently low as to preclude significant effects on certified seed potato value. For bacterial ring rot and potato spindle tuber viroid, there is a zero tolerance, and the discovery of a single plant in the field or a tuber in storage infected with one of these diseases shall cause the rejection of the field or lot. The absence of a finding shall not be construed to mean that the field or lot inspected is free from the disease.

Subp. 7. **Warranty.** A certification does not represent a warranty of any kind, express or implied, including merchantability, as to the quality of the crop produced from the certified seed potatoes. A certification represents only that the seed potatoes were produced, graded, sacked or placed in bulk, and inspected in accordance with parts 1510.2300 to 1510.2355.

1510.2315 APPLICATION FOR INSPECTION.

Subpart 1. **Eligibility; procedure.** All potatoes planted on a farm must be entered for certification. Application for inspection must be made before June 16 each year on forms furnished by the commissioner. Applications postmarked after June 15 but before July 1 must be charged a 50 cents per acre late registration fee. No applications may be accepted that are postmarked later than June 30. The commissioner may extend the deadline due to special circumstances, such as natural disasters, which make it impractical or impossible for planting to be completed by the deadline and which affect an area or large number of growers.

Subp. 2. **Shipping point inspection certificates, bulk seed certificates, or certificates of origin.** An application for the inspection of a field planted with purchased certified seed potatoes must include copies of either the shipping point inspection certificates, bulk seed certificates, or certificates of origin for the total amount of purchased certified seed potatoes planted. Use of certificates of origin requires approval of both the seller and the purchaser and is restricted to intrastate shipments between certified seed potato producers. The certificate of origin must contain information considered necessary by the commissioner and must at a minimum identify seed potatoes as to the producer, variety, classification, and lot. The limitation of warranty in part 1510.2310, subpart 7, must be further limited to exclude any representation as to condition of the potatoes at the time of shipment.

Subp. 3. **Separate application.** A separate application must be completed for each field planted.

Subp. 4. **Sufficient acreage.** No application for inspection may be accepted from a grower in a community or county in which there is not sufficient acreage for the total inspection fee charges to cover the cost of wages and expenses of the inspectors providing the inspection service. Determination of sufficient acreage must be made by the commissioner.

1510.2320 SEED POTATOES ELIGIBLE FOR MINNESOTA CERTIFICATION PLANTING.

Subpart 1. **Authorization.** A field may not be inspected for certification unless both the seed potato variety and the particular lot planted have the authorization of the commissioner. In considering seed potato varieties for authorization for certification planting,

the commissioner shall consider scientific evidence and expert opinion. To be eligible for certification planting, seed potatoes must meet the requirements of subpart 2 or 3.

Subp. 2. **Minnesota grown seed potatoes.** The following classes of seed potatoes grown in Minnesota are eligible for planting: Prenuclear, Generation 1, Generation 2, Generation 3, Generation 4, Generation 5, Primary Foundation 1, Primary Foundation 2, Foundation 1, Foundation 2, and experimental status seed potatoes. The commissioner shall authorize the planting of Certified class or Generation 6 class seed potatoes if there is no source of higher classes than Certified class or Generation 6 class seed potatoes available to the grower, the lot has been winter tested, and the seed does not pose a serious disease threat.

Subp. 3. **Non-Minnesota grown seed potatoes.** Seed potatoes grown outside of the state approved for certification planting by the certifying agency in another state or a Canadian province may be planted if requirements for certification meet Minnesota requirements for certified seed potatoes of classes higher than Certified class or Generation 6 class, as indicated on an import affidavit.

Subp. 4. **Experimental status.** Seedlings or numbered selections may be accepted for entrance into the certification system in an experimental status. The applicant shall submit a written statement with the certification application from the breeder, originator, or originator's designee that the applicant has full and unrestricted rights to introduce the seedling or numbered selection into the commercial market, and that the seedling or numbered selection must be named within five years from acceptance of the application. If the seedling or numbered selection is not named within five years from acceptance of the application, a two-year waiting period must pass before the seedling or numbered selection may be reentered into the certification program. Seedlings or numbered selections in experimental status must be designated as a class and conform to the requirements of that class. The word "EXPERIMENTAL" must be added on the tag. Lots from a breeder's seed that have not gone through the testing and, when necessary, virus-freeing, are considered either Foundation class 1 or 2, "EXPERIMENTAL."

Subp. 5. **Protected varieties.** Before a seed potato variety protected under the Plant Variety Protection Act Amendments of 1994 may be entered into the certification system, the applicant must submit a written statement with the certification application from the breeder, originator, or originator's designee that the applicant has full and unrestricted rights to introduce the protected variety into the commercial market.

1510.2325 REQUIREMENTS FOR CERTIFIED SEED POTATO PRODUCTION.

Subpart 1. **Requirements.** The standards in this part and part 1510.2330 must be met before potatoes may be classified as certified seed potatoes.

Subp. 2. **Field inspection and laboratory testing.** Certification must be based upon information regarding the following: stand, general vigor, varietal purity, disease tolerances, and factors affecting field inspection. At least two field inspections must be made of each field during the growing season. A final inspection must be made for bacterial ring rot, when symptom expression is optimal. If a final inspection cannot be carried out, because of management practices of the grower, or for reasons out of the grower's control, a laboratory test is necessary to maintain eligibility for certification. Additional inspections and laboratory tests may be made if necessary to meet phytosanitary requirements in established markets such as other states and Canadian provinces.

A. Stand. A field shall be rejected if there are a large number of plants missing due to disease.

B. General vigor. A field shall be rejected if it contains a large number of weak plants.

C. Ring rot. If bacterial ring rot is found in any field or lot, the remaining crop is not eligible for certification planting.

D. Varietal purity. A field must be rejected if it contains more than the tolerances acceptable for a specific class as listed in Tables 1 and 2 in part 1510.2330, subparts 11 and 12.

E. Disease tolerances (percentage of infected plants). A field must be rejected if it contains percentages of diseased plants in excess of those acceptable for a specific class as listed in Tables 1 and 2 in part 1510.2330, subparts 11 and 12.

F. Factors affecting field inspection. A field shall be rejected if any of the following are present to such an extent that satisfactory inspection for diseases cannot be made: early or late blight; blackleg or wilt of any kind; weeds; insect injury; chemical damage.

A field shall be rejected if any other conditions are present to such an extent that satisfactory inspection for diseases cannot be made. A field is ineligible for certification if there are cull piles in such close vicinity to the field that contamination of the field can be expected.

Subp. 3. **Roguing.** If any of the diseases listed in part 1510.2330 are present in a field in amounts less than the maximum disease tolerance level, the field must be rogued and the infected plants removed before the final inspection. If roguing is done after tubers form, the tubers from the rogued plants shall also be removed and destroyed.

Subp. 4. **Storage.** Lots shall not be stored in any warehouse where other potatoes are stored, nor shall they be stored under conditions of possible disease contamination. If more than one grower stores lots in the same warehouse, each grower's lots shall be properly identified by labeling the bin with the grower's name and address, variety, and amount in the bin. If the lots are to be stored in a public warehouse or storage unit not directly under the control of the grower, a complete record giving location of the storage unit, number of the bin, variety, and the quantity stored shall be sent to the commissioner when the lots are put into storage. If it is available, a copy of the warehouse receipt shall also be sent to the commissioner.

Equipment used for grading and handling lots shall not be used for any other potatoes. If any equipment is used on other potatoes, the lots shall be rejected.

Any firm handling lots on contract shall label all bins containing lots with the name of the grower whose lots are being stored. Responsibility for proper labeling and subsequent handling rests with the firm. No certification tags or bulk certificates shall be issued until this is done.

Each grower shall submit a completed storage and yield report on each lot on forms furnished by the commissioner. Certification tags shall not be issued to growers who have not submitted the report.

Subp. 5. **Tags and bulk certificates.** Official blue, yellow, or white tags, bearing the grower's name and address, the potato variety, and the crop year shall be issued when the potatoes meet the certification requirements described in parts 1510.2310 to 1510.2330. Tags shall be fastened onto sacks so as to constitute a seal at the time the lots are prepared for shipment. Bulk certificates must also show the date of issuance, the class, the grade, and the approximate weight of the load.

Tags shall be issued only to growers, except when lots are stored in a public warehouse or in a storage unit not under direct control of the grower. They shall be issued to the owner or manager of the storage unit upon receipt of written authorization from the grower.

Responsibility for ordering tags shall rest entirely with each grower.

Subp. 6. **Grading.** All lots shall be inspected at the loading point whenever possible. If inspection at the loading point is impossible, request for grading inspection in transit shall be made. Every bagged lot or shipment offered for sale and bearing official certification tags shall be in new even-weight sacks. Bulk shipments shall be identified with a bulk certificate. Both bagged and bulk lots or shipments must meet grade standards specified in

part 1510.2355. Lots or shipments that fail to meet grade standards when inspected shall be reconditioned, or:

A. if the lot or shipment is in sacks, the tags shall be removed under the supervision of a state or federal/state inspector before the lot or shipment is allowed to proceed to its destination; and

B. if the shipment is in bulk, no bulk certificate shall be issued.

All costs of reconditioning to meet grade shall be borne by the shipper.

1510.2330 REQUIREMENTS FOR PRODUCTION OF DIFFERENT CLASSES OF CERTIFIED SEED POTATOES.

Subpart 1. Prenuclear class certified seed potatoes (PN).

A. A lot grown as and intended to be Prenuclear must be grown from plants tested and shown to be free from the following pathogens:

B. Prenuclear class seed potatoes must be produced in a greenhouse or screenhouse under sanitary conditions, free from insects and weeds that can harbor or transmit potato diseases or other conditions of possible disease contamination. All facilities must be sufficiently insulated from insects by screens and double doors. The facilities and the equipment are subject to inspection to verify freedom from possible disease contamination.

C. One percent of each lot or ten plants or tubers from each lot, whichever is greater, must be tested during the growing season to verify that the crop is free from potato virus X, potato virus Y, potato leaf roll virus, *C. michiganensis*, and *P. atrosepticum*.

D. Prenuclear tubers may originate from greenhouse tubers for one year only if the greenhouse tubers have remained at the same growing operation and have remained isolated from field-grown tubers.

E. A lot must be rejected if it contains any diseased plants at any inspection, or varietal mixture at final inspection.

F. The allowable tolerances for disease and varietal mixture for seed potatoes classified as prenuclear are in Table 1 in subpart 11 under column PN.

Subp. 2. Generation 1 class certified seed potatoes (G1). Generation 1 class seed potatoes must meet the following requirements:

A. The seed source must be either Prenuclear tubers or plantlets.

The allowable tolerances for disease and varietal mixture are in Table 1 in subpart 11 under column G2.

Subp. 4. **Generation 3 class certified seed potatoes (G3).** Generation 3 class seed potatoes must originate from Generation 2 class seed potatoes. The allowable tolerances for disease and varietal mixture are in Table 1 in subpart 11 under column G3.

Subp. 5. **Generation 4 class certified seed potatoes (G4).** Generation 4 class seed potatoes must originate from Generation 3 class seed potatoes. The allowable tolerances for disease and varietal mixture are in Table 1 in subpart 11 under column G4.

Subp. 7. **Generation 6 class certified seed potatoes (G6).** Generation 6 class seed potatoes must originate from Generation 5 class seed potatoes. The allowable tolerances for disease and varietal mixture are in Table 1 in subpart 11 under column G6.

Subp. 8. **Primary Foundation classes (PF).**

A. A lot grown as and intended to be Primary Foundation certified seed potatoes must originate from clonal selection, with all clones laboratory tested and be proven free from the following pathogens:

- (1) *Clavibacter michiganensis ssp. sepedonicus* (ring rot);
- (2) potato virus A;
- (3) potato virus M;
- (4) potato virus Y;
- (5) potato spindle tuber viroid; and
- (6) potato leaf roll virus.

B. A lot must be kept under direct control of the grower and must not be stored in any warehouse in which other potatoes are stored.

C. The two classes of Primary Foundation seed potatoes are PF1 and PF2.

(1) PF1 class certified seed potatoes must originate from clonal multiplication where all clones have been laboratory-tested. PF1 class seed potatoes are tuber united. Crops must be free of bacterial ring rot for a minimum of two years to be eligible to be PF1 class seed potatoes. The allowable tolerances for disease and variety mixture are in Table 2 in subpart 12 under column PF1.

(2) PF2 class certified seed potatoes must originate from PF1 class seed potatoes and originate from the same farm operation. They must be grown from potatoes produced on a tuber unit seed plot. Crops must be free of bacterial ring rot for a minimum of two years to be eligible to be PF2 class seed potatoes. The allowable tolerances for disease and varietal mixture are in Table 2 in subpart 12 under column PF2.

Subp. 9. **Foundation classes (F).** The two classes of Foundation class seed potatoes are F1 and F2.

A. F1 class certified seed potatoes must originate from Primary Foundation class seed potatoes. The allowable tolerances for disease and varietal mixture are in Table 2 in subpart 12 under column F1.

B. F2 class certified seed potatoes must originate from F1 class seed potatoes. The allowable tolerances for disease and varietal mixture are in Table 2 in subpart 12 under column F2.

Subp. 10. **Certified class certified seed potatoes.** Certified class seed potatoes must originate from Foundation or Generation classes of seed potatoes. The allowable tolerances for disease and varietal mixture are in subpart 11, Table 2, under column C.

1510.2355 MINNESOTA CERTIFIED SEED POTATO GRADES AND TOLERANCES.

Subpart 1. **Minnesota certified seed potato grades.** Before potatoes are eligible for grading as certified seed potatoes, the requirements of parts 1510.2315 to 1510.2330 must be met.

Subp. 2. **Minnesota blue tag certified seed potato grade.** To be graded as Minnesota blue tag certified seed potatoes, the potatoes must meet the requirements in items A to C.

A. Condition. The potatoes must be, at the time of final inspection, of one variety, unwashed, fairly well-shaped, free from bacterial ring rot, late blight, freezing, black heart, and soft rot or wet breakdown, and free from damage caused by soil or other foreign matter, second growth, air cracks, cuts, shriveling, sprouts, pitted scab, surface scab, powdery scab, russet scab, dry rot, other diseases, insects or worms, mechanical or other means, flattened or depressed areas with underlying flesh discoloration, and from serious damage caused by hollow heart, wire worm, growth cracks, or internal discoloration other than hollow heart. Sunburn and silver scurf are not factors. This item does not apply to hollow heart if labeled "hollow heart exempt," on the tag or certificate.

B. Size. For round or intermediate shaped varieties, the maximum size is 12 ounces (340.2 grams) and, unless otherwise specified, the minimum size shall be not less than 1-1/2 inches (38.1 millimeters) in diameter. For long varieties, the maximum size is 14 ounces (396.9 grams) and, unless otherwise specified, the minimum size shall be not less than 1-1/2 inches (38.1 millimeters) in diameter. For all varieties, size "B," the minimum diameter shall be not less than 1-1/2 inches (38.1 millimeters) and the maximum size shall be not more than 2-1/4 inches (57.1 millimeters) in diameter. The department may grade potatoes that do not meet the maximum and minimum size specifications as Minnesota blue tag certified seed potatoes if the buyer agrees to accept potatoes of alternate size specifications from the grower and these specifications are listed on the tag or bulk certificate issued by the department.

C. Lot tolerances. In order to allow for variations incident to proper grading and handling, the following tolerances, by weight, are provided:

(1) For defects:

(a) ten percent for potatoes seriously damaged by hollow heart, unless labeled "hollow heart exempt" on the tag or certificate;

(b) five percent for potatoes seriously damaged by internal discoloration (other than hollow heart);

- (c) ten percent for potatoes damaged by soil or other foreign matter;
- (d) 20 percent for potatoes damaged by sprouts;
- (e) ten percent for potatoes seriously damaged by wireworm; and
- (f) six percent for potatoes which fail to meet the remaining requirements of the grade, provided that included in that amount not more than the following percentages are allowed for the following defects:
 - i. soft rot, frozen, or wet breakdown, 0.5 percent;
 - ii. damage by surface, powdery, or pitted scab, 2.0 percent;
 - iii. damage by dry rot, 2.0 percent, of which not more than 1.0 percent late blight tuber rot;
 - iv. bacterial ring rot, 0.0 percent; and
 - v. late blight tuber rot, 1.0 percent; and
- (g) the following do not affect seed quality and must not be scored against the grade:
 - i. brown discoloration following skinning;
 - ii. dried stems;
 - iii. flattened or depressed areas showing no underlying flesh discoloration;
 - iv. greening;
 - v. sunburn;
 - vi. skin checks; and
 - vii. silver scurf.

(2) For offsize:

- (a) five percent for potatoes which fail to meet the required or specified minimum size; and
- (b) ten percent for potatoes which fail to meet the required maximum size.

Subp. 3a. **Minnesota yellow tag certified seed potato grade.** To be graded as Minnesota yellow tag certified seed potatoes, the potatoes must meet the requirements in items A to D.

A. Condition. At the time of final inspection, the potatoes must be of one variety, unwashed, fairly well-shaped, free from bacterial ring rot, late blight, freezing, black heart, and soft rot or wet breakdown, and free from damage caused by second growth, air cracks, cuts, shriveling, pitted scab, surface scab, powdery scab, dry rot, other diseases, insects or worms, mechanical means or other means, and from serious damage caused by soil or other foreign matter, hollow heart, wireworm, growth cracks, russet scab, or internal discoloration other than hollow heart. Sunburn and silver scurf are not factors. This item does not apply to hollow heart if labeled "hollow heart exempt," on the tag or certificate.

B. Size. For all varieties, the maximum size is 14 ounces (396.9 grams) and the minimum size is 1-1/2 inch (38.1 mm) in diameter. For all varieties, the minimum diameter for size "B" shall not be less than 1-1/2 inches (38.1 millimeters) and the maximum diameter shall not be more than 2-1/4 inches (57.1 millimeters). The department may grade potatoes that do not meet the maximum and minimum size specifications as Minnesota yellow tag certified seed potatoes if the buyer agrees to accept potatoes of alternate size specifications

from the grower and these specifications are listed on the tag or bulk inspection certificate issued by the department.

C. Lot tolerances. In order to allow for variations incident to proper grading and handling, the following tolerances, by weight, are provided:

(1) for defects:

(a) 20 percent for potatoes seriously damaged by hollow heart, unless labeled "hollow heart exempt" on the tag or certificate;

(b) five percent for potatoes seriously damaged by internal discoloration (other than hollow heart);

(c) ten percent for potatoes seriously damaged by soil or other foreign matter;

(d) ten percent for potatoes seriously damaged by wireworm;

(e) 20 percent for potatoes that fail to meet the remaining requirements of the grade with not more than six percent serious damage provided that included in that amount not more than the following percentages are allowed for the following defects:

i. soft rot, frozen, or wet breakdown, 0.5 percent;

ii. damaged by surface, powdery, or pitted scab, 5.0 percent;

iii. damaged by dry rot, 2.0 percent, of which not more than 1.0 percent is late blight tuber rot;

iv. bacterial ring rot, 0.0 percent; and

v. late blight tuber rot, 1.0 percent; and

(f) the following do not affect seed quality and must not be scored against the grade:

i. brown discoloration following skinning;

ii. dried stems;

iii. flattened or depressed areas with or without underlying flesh discoloration;

iv. greening;

v. sunburn;

vi. skin checks;

vii. silver scurf; and

viii. sprouts; and

(2) for offsize:

(a) five percent for potatoes that fail to meet the required or specified minimum size; and

(b) ten percent for potatoes that fail to meet the required maximum size.

D. Shape. The potatoes must be fairly well shaped, with an exception for long varieties when specified as "except for shape." In that case the tubers may be misshapen.

Subp. 4. **Minnesota white tag certified seed potato grade.** Minnesota white tag certified seed potato grade consists of certified seed potatoes that are graded according to agreement between the seller and the purchaser as to size and defects, except that not more than one-half percent of soft rot, frozen, or wet breakdown and two percent dry rot, of which not more than one percent late blight tuber rot is allowed.

Subp. 5. **Application of tolerance.** The contents of individual containers, other than bulk conveyances, in the lot are subject to the following limitations provided that the averages for the entire lot are within the tolerances specified for the grade. An individual container in any lot may contain not more than double the tolerance specified except for sprouts and except that at least one defective specimen, other than bacterial ring rot, and one offsize specimen may be permitted in any container.

Subp. 6. **Condition after transit.** Deterioration developing in transit shall be considered as affecting condition and not grade.

Subp. 7. **Definitions.** For the purpose of this part, the terms in items A to J have the meanings given them unless the context clearly indicates otherwise.

A. "Mature" means that the outer skin (epidermis) does not loosen or "feather" readily during the ordinary methods of handling.

B. "Well-shaped" means the normal shape for the variety.

C. "Fairly well-shaped" means that the individual potato is not materially pointed, dumbbell-shaped, or otherwise ill-formed.

D. "Fairly clean" means that the individual potato is reasonably free from dirt, staining, or other foreign matter.

E. "Slightly dirty" means that the appearance of the individual potato is not materially affected by dirt, staining, or other foreign matter.

F. "Diameter" means the greatest dimension at right angles to the longitudinal axis. The long axis shall be used without regard to the position of the stem (stolon).

G. "Soft rot or wet breakdown" means any soft, mushy, or leaky condition of the tissues.

H. "Dry rot" means decaying tissue that is dry.

I. "Damage" means any defect or combination of defects which materially affects the appearance of the individual potato or which cannot be removed without a loss of more than five percent of the total weight of the potato including the peel covering the defective area. Any one of the following defects or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage:

(1) russet scab when it materially detracts from the appearance of the individual potato;

(2) second growth or growth cracks which have developed to such an extent as to materially affect the appearance of the individual potato;

(3) air cracks when removal causes a loss of more than five percent of the total weight of the potato;

(4) shriveling when the potato is more than moderately shriveled, spongy, or flabby;

(5) sprouting when the individual potato has sprouts over one inch in length;

(6) surface, powdery, or pitted scab, individually or in combination, which covers an area of more than five percent of the surface of the potato in the aggregate, or causes a loss of more than five percent of the total weight of the potato including peel covering defective area;

(7) soil if the individual potato has more than 50 percent of its surface affected by lightly caked soil which is scattered, or more than 15 percent of its surface badly caked with soil.

J. "Serious damage" means any defect or combination of defects which seriously affects the appearance of the individual potato or which cannot be removed without a loss

of more than ten percent of the total weight of the potato including the peel covering the defective area. Any one of the following defects or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect shall be considered as serious damage:

- (1) russet scab when it seriously detracts from the appearance of the potato;
- (2) dirt when the appearance of the individual potato is seriously affected by caked or smeared dirt or other foreign matter;
- (3) cuts when both ends are clipped or when more than an estimated one-fourth of the potato is cut away from one end or when the remaining portion of the clipped potato weighs less than six ounces;
- (4) other cuts which seriously affect the appearance of the individual potato or which cannot be removed without a loss of more than ten percent of the total weight of the potato including peel covering defective area;
- (5) shriveling when the potato is excessively shriveled, spongy, or flabby;
- (6) surface, powdery, or pitted scab, individually or in combination, which covers an area of more than 25 percent of the surface of the potato in the aggregate, or causes a loss of more than ten percent of the total weight of the potato including peel covering defective area;
- (7) wireworm and air cracks when removal causes a loss of more than ten percent of the total weight of the potato.
