

Hello.

I am writing to you with my concerns over this proposed Red Flag Gun issue. I feel that this legislation is very unnecessary and will only lead abuse and trouble for the law abiding citizen. Today if an indecent was to occur with someone who is deemed dangerous, law enforcement would take appropriate actions to resolve the issue. No Red Flag law needed. Too much room for abuse in this legislation! No proof of this deemed dangerous person, Go take guns then the person needs to prove he is not dangerous to receive his/her property back. Guilty until proven innocent! At what expense? When I was getting divorced, my ex-wife turned me in for sexual abuse of my two daughters, No proof no nothing instantly guilty until proven innocent. Worked great for her in the divorce even though it was a lie and unproven. If this red flag law was in place she would have used that also! For years my neighbor had an annual fish fry every fall. On Friday night everyone would show up and bring their fish and help set up for the next day. The neighbor on the other side was upset about a tree yes a tree, call the DNR and told them the neighbor was hoarding fish and was way over his limit. Of course DNR shows up searches his house and confiscates the fish. This Red Flag Law is the same thing only on an escalated scale. Guilty until proven innocent. No repercussion for the person accusing. The private information of the person accusing does not even need to be revealed! I respectfully request that this legislation be opposed

Thank You  
Mark
