

Subject Grants for emergency shelter facilities

Authors Gomez and others

Analyst Justin Cope

Date February 7, 2022

Overview

H.F. 3090 establishes a grant program to fund shelter development and renovation.

Summary

This bill appropriates \$75,000,000 in fiscal year 2023 from the general fund to the commissioner of human services to fund grants for the development, improvement, or expansion of emergency shelter facilities.

Eligible grant applicants include cities, counties, Tribal governments, nonprofits, and housing and redevelopment authorities.

The commissioner must prioritize projects which add additional shelter facilities or shelter facility beds or which improve the habitability or accessibility of existing shelter facilities. A grant may pay for total project expenditures or a specified project phase, up to \$10,000,000 per project. A project funded with a grant must meet state and local building codes upon completion.

Effective July 1, 2022.
