

# Chapter 62

2019 regular session

**Subject** Information technology, user acceptance testing

**Analyst** Deborah A. Dyson

**Date** May 21, 2019

## Overview

Requires a state agency implementing a new information technology business software application or functionality that significantly impacts the operations of a primary user to give the primary user the opportunity to test it. Provides an exception. Does not apply to routine software upgrades or changes to comply with federal law, rules, or regulations.

A primary user is an employee or agent of a state agency or local government that uses the software for an official function. Local government does not include a school district.

Effective August 1, 2019.
