This bill modifies a 2008 law that nullifies the actions of towns to eliminate a town road from its possession and converts that road to a cartway. For the nullification and conversion to take place, certain conditions must be met, and one of the conditions is that the state or a political subdivision has constructed a road or bridge improvement on that town road. The bill allows for state or political subdivision funding of such construction (as opposed to construction by the state or political subdivision).
