Section

- 1** **Clinical follow-up to elevated blood lead level.** Amends § 144.9504, by adding subdivision 12. Requires health care providers to provide certain services to a child whose blood lead level exceeds five micrograms of lead per deciliter of blood:
- A venous blood test for the child three months after the initial screening;
 - Venous blood test for all children under age five living in the same residence as the child; and
 - Family education as to potential sources of lead and ways to avoid exposure.
- Defines “health care provider” for purposes of this subdivision.
