Overview

This bill classifies the telephone number, personal email address, and certain online access data of individuals that are collected by a government entity for notification or informational purposes.

Section

1 **Personal contact information.** Provides that the telephone number, personal email address, and certain online access data of an individual that is collected, maintained, or received by a government entity for notification or informational purposes is private data on individuals.

Classifying this data as “private” means that it is accessible to the subject of the data, but not accessible to the general public. Currently, these data are presumptively public because they are not otherwise classified by law.

Data classified under this section are exempt from the requirement that a data subject be provided a Tennessen warning under section 13.04, subdivision 2 when asked to supply private data. A Tennessen warning includes, among other things, notification about the way the data will be handled and used.
