Overview

This bill permits an individual to register to vote and/or request an absentee ballot online, using a website operated by the secretary of state.

Section

1 **Prior to election day (voter registration).** Authorizes an eligible individual to submit a voter registration application through a secure website maintained by the secretary of state.

An email address, plus the applicant's driver's license number, state identification card number, or the last four digits of the applicant's social security number are required to use the website.

Paragraph (b) provides that an application submitted electronically may only be transmitted for processing if the identification number provided by the applicant is verified. If an application is unverifiable, the application must be reviewed for evidence of suspicious activity and, if appropriate, forwarded to law enforcement for investigation.

Submission of a registration application through the website on behalf of another individual is prohibited.

Website security (online registration). Requires the secretary of state to maintain a log of Internet Protocol (IP) addresses used to submit a voter registration application electronically. The secretary is required to monitor the log, volume of website use, and other indicators, for evidence of suspicious activity. Potential suspicious activity that can not be resolved by the secretary of state must be forwarded to law enforcement for investigation.

Section

Form. Provides conforming changes to the provisions governing the format of a voter registration application, to reflect the new authorization to submit the application online.

Paper and electronic applications are required to contain the same information, except where otherwise specified in the law.

- **Deficient registration.** Provides that a voter registration application submitted through the website of the secretary of state prior to enactment of this bill does not invalidate the application.
- **Registration files.** Requires a voter registration application submitted electronically via the secretary of state's website to be maintained in its original form, in a manner suitable for printing, for the same time period that paper applications must be maintained.

The IP address used to submit an electronic application must be maintained with the voter registration data.

- Investigations; prosecutions. Specifies jurisdictional standards for initiating an investigation or prosecution of alleged voter registration crimes, related to electronic submission of a registration application via the secretary of state's website. Alleged crimes may be investigated and prosecuted in the county in which the individual registered or attempted to register.
- Application procedures (absentee ballots). Authorizes a voter to submit an application to receive an absentee ballot for a federal, state, or county election through a secure website maintained by the secretary of state.

An email address, plus the applicant's driver's license number, state identification card number, or the last four digits of the applicant's social security number are required to use the website.

An application submitted electronically may only be transmitted for processing if the identification number provided by the applicant is verified. If an application is unverifiable, the application must be reviewed for evidence of suspicious activity and, if appropriate, forwarded to law enforcement for investigation.

- Website security (standard absentee applications). Requires the secretary of state to maintain a log of Internet Protocol (IP) addresses used to submit an absentee ballot application electronically. The secretary is required to monitor the log, volume of website use, and other indicators, for evidence of suspicious activity. Potential suspicious activity that can not be resolved by the secretary of state must be forwarded to law enforcement for investigation.
- **Application for ballot (UOCAVA).** Authorizes a military or overseas voter to submit an application to receive an absentee ballot for an election through a secure website maintained by the secretary of state.
