---

This bill updates the schedules of controlled substances contained in chapter 152. Minnesota law requires the Executive Director of the Board of Pharmacy to recommend to the legislature updates to the statutory controlled substance schedules so that the statutory schedules match the schedules maintained by the Board. The bill adds fourteen synthetic drugs to Schedule I. These drugs are either cannabinoids, hallucinogens, stimulants, or CNS depressants. The board of pharmacy has concluded that each of the drugs can be abused, are potentially addictive, and have no approved medical uses, which are the criteria for placing a drug on schedule I. The BCA and local law enforcement agencies have notified the Board of Pharmacy that these drugs have been confiscated in Minnesota.

The bill also adds the drug eluxadoline to Schedule IV. Eluxadoline is a FDA-approved drug that is used for the treatment of irritable bowel syndrome. Upon its approval, it was placed in the federal Schedule IV.
