---

This bill directs MnDOT to create and implement a performance, stewardship, and sustainability plan for the state's transportation system. A number of required plan components are identified, including an inventory, system performance measures, district performance targets, performance gaps identification, impact assessments for projects, ten-year district-level investment planning, and financial sustainability planning. The plan is due to the legislature by December 15 annually, with the first one due in 2018. MnDOT is prevented from implementing plan elements until after submission to the legislature.
