---

This bill directs MnDOT to develop best practices for highway project selection processes, for both the standard highway program and specialty programs (such as Corridors of Commerce). It identifies stakeholders to involve, requires description of the processes and associated ranking criteria, and mandates publicizing the best practices as well as ranking and scoring outcomes.

The best practices must be started to be implemented by January 1, 2018, and a legislative report is required by March 1, 2018.
