This bill appropriates an additional \$105 million to MnDOT from the trunk highway fund, for fiscal year 2017. The funds are for the state road construction budget activity. This amount reflects increased federal highway aid available to the state.

The appropriation has a conditional effective date of the day following submission by MnDOT to the legislature of unredacted communications and materials related to a 2016 Legislative Advisory Commission (LAC) request by MnDOT for the federal funds being appropriated in this bill. (A redacted version of communications had previously been provided to a member of the legislature following a Minnesota Government Data Practices Act request.)
