Overview

Under section 245A.50, licensed family child care providers and their helpers are required to receive initial and ongoing training and instruction on reducing the risk of sudden unexpected infant death and abusive head trauma from shaking infants and young children. This bill, if passed, would exempt certain individuals from these training requirements.

Section

- 1 Sudden unexpected infant death and abusive head trauma training.** Amends section 245A.50, subdivision 5. Adds paragraph (f) to exempt an individual related to the license holder, who is not a designated caregiver or helper for the child care program, and who only cares for the license holder's own child, from the sudden unexpected death and abusive head trauma training requirements.
