This bill, as proposed to be amended, requires MnDOT to study a segment of Trunk Highway 65 north of U.S. Highway 10 in Blaine and Ham Lake, in order to examine traffic congestion, impacts to freight, congestion reduction options, and improvements at one of the intersections. It appropriates an amount to be determined in fiscal year 2017 from the trunk highway fund for the study. Any unused funds from the appropriation are made available for project work resulting from the study.
