**Date** March 4, 2019

## Overview

This bill extends the existing Legislative Commission on Data Practices and Personal Data Privacy to June 30, 2026. The commission is currently scheduled to expire on June 30 of this year.

The commission is made up of eight legislators: four each from the house of representatives and the senate, balanced equally between the majority and minority caucuses. The commission's duties include research and analysis of issues impacting the Minnesota Government Data Practices Act and the security and privacy of personal data.

The bill also includes an appropriation to support the work of the commission. In the past, the commission's funding has been used to hire a part-time research assistant to support the commission's work.
