## Overview

H.F. 1763 requires Minnesota Management and Budget (MMB) to publish an interactive taxpayer receipt on its website. The receipt will show the share of the state budget represented by different expenditure categories, as well as performance goals and outcomes for those expenditures. Based on the user's income, the website will estimate the amount of major state taxes paid by the user, and allocate the user's tax dollars to the expenditure categories displayed.

The bill also requires the Department of Revenue to allow taxpayers to elect to receive information about accessing the receipt on their individual income tax forms, and appropriates an unspecified amount to MMB to develop the system.
