

Subject School board policies on student deaths

Authors Carlson, A.

Analyst Ben Weeks

Date February 26, 2020

Summary

Requires a school board or charter school board to adopt a policy providing how the school district or charter responds to the death of an enrolled student. The policy must address four items: communications with students, parents, and staff; availability of grief counselors; remembrance events; and physical memorials. Boards may consult with MDE's School Safety Technical Assistance Council in developing a policy.
