Overview

This bill adjusts motor vehicle weight limits and associated penalties for sewage septic tank trucks that transport sewage from septic or holding tanks.

Summary

Section	Description
1	Sewage septic tank trucks. Provides various exemptions to wheel, per axle, and gross motor vehicle weight limits for sewage septic tank trucks that exclusively haul sewage from septic or holding tanks.
2	Recycling and garbage vehicles. Broadens exemptions from vehicle weight limits and corresponding criminal penalties related to (1) limits set by local units of government for roads under their respective jurisdiction, and (2) spring load restrictions (which are established by MnDOT during spring thaw periods). The exemptions are for sewage septic tank trucks that exclusively haul sewage from septic or holding tanks. Under current law, the exemptions are provided for some types of solid waste and recycling vehicles.
