

Subject Vaping awareness and prevention instruction

Authors Edelson and others

Analyst Ben Weeks

Date February 17, 2020

Summary

Requires the Departments of Education and Health to collaborate in the creation of instructional materials for smoking and vaping prevention. The bill also requires a public school to provide vaping prevention instructions at least once during grades 6 through 8 and encourages schools to do the same during grades 9 through 12. Lastly, the bill requires questions about tobacco use and vaping be included in the Minnesota student survey.
