- requiring prior authorization requirements and restrictions and data on prior authorizations to be posted on public websites; and
- providing for continuity of care regarding prior authorizations.

2	Adverse determination. Adds subd. 1a to § 62M.02. Defines adverse determination as a decision by a utilization review organization relating to an admission, extension of stay, or health care service that is partially or wholly adverse to the enrollee, including a decision to deny an admission, extension of stay, or health care service on the basis that the service is not medically necessary (this term replaces the term “determination not to certify” currently used in chapter 62M).

Also updates terms used.</p>
9	<p>Standard review determination.</p> <p>Amends § 62M.05, subd. 3a. Requires a utilization review organization to communicate to the provider and the enrollee a standard review determination on all requests for utilization review within five business days after receiving the request, instead of ten business days as in current law. 10	<p>Expedited review determination.</p> <p>Amends § 62M.05, subd. 3b. Requires a utilization review organization to provide to the hospital, attending health care professional, and enrollee, a determination on a request for expedited determination within 48 hours after the initial request, rather than 72 hours as in current law.
