

Subject Higher education: University of Minnesota review of PFAS

Authors Claflin and others

Analyst Nathan Hopkins

Date March 25, 2019

Overview

This bill requests the University of Minnesota to conduct public health research on exposure to pre- and polyfluoralkyl substances (PFAS). By January 15, 2020, a report would be due to the legislature on the results of the research. \$315,000 in onetime spending is appropriated to the University for this purpose.
