

Subject University of Minnesota/Mayo Clinic regenerative medicine partnership appropriation requirements modified

Authors Erickson

Analyst Sean Williams

Date February 26, 2020

Summary

The bill modifies language from the 2014 and 2019 appropriations to the regenerative medicine partnership between the University of Minnesota and the Mayo Clinic. The bill makes three main changes:

- 1) It adds language permitting the partnership to provide grants to advance the field of regenerative medicine.
- 2) It adds “education” to the list of purposes of the state appropriation.
- 3) It requires the partnership to include the outcomes of the funded projects in its biennial report to the legislature.
