

Subject Medical cannabis program

Authors Edelson and others

Analyst Elisabeth Klarqvist

Date March 9, 2020

Overview

This bill modifies provisions governing the medical cannabis program. It allows patients to administer medical cannabis by vaporizing raw cannabis (dried leaves, flower, or plant form); makes any patient with cancer or a terminal illness eligible to participate in the program; and allows medical cannabis manufacturers to deliver medical cannabis to patients and to operate mobile distribution units.

Summary

Section	Description
1	<p>Delivery vehicle.</p> <p>Adds subd. 2a to § 152.22. Defines delivery vehicle for the medical cannabis program, as a motor vehicle that: (1) is designed and manufactured to operate on streets and highways; and (2) contains an enclosed cabin and an enclosed cargo-carrying area.</p>
2	<p>Medical cannabis.</p> <p>Amends § 152.22, subd. 6. Amends the definition of medical cannabis for the medical cannabis program, to allow patients to administer medical cannabis by vaporizing raw cannabis. (Under current law raw cannabis—the dried leaves, flower, or plant form—is not an allowable form of medical cannabis; and a patient is only authorized to vaporize medical cannabis using liquid or oil.)</p>
3	<p>Mobile distribution unit.</p> <p>Adds subd. 8a to § 152.22. Defines mobile distribution unit for the medical cannabis program, as a motor vehicle that: (1) is designed and manufactured to operate on streets and highways; (2) contains an enclosed cabin and enclosed cargo-carrying area; (3) is readily movable between locations; and (4) is used by a medical cannabis manufacturer to distribute medical cannabis and medical cannabis products.</p>
4	<p>Qualifying medical condition.</p> <p>Amends § 152.22, subd. 14. Only patients with a qualifying medical condition may enroll in the medical cannabis program. This section modifies the definition of</p>

Section	Description
---------	-------------

qualifying medical condition to allow any patient with cancer or a terminal illness with a probable life expectancy of under one year to enroll in the program. (Under current law a patient with cancer or a terminal illness may enroll in the program only if the cancer, terminal illness, or treatment causes severe or chronic pain, nausea or severe vomiting, or cachexia or severe wasting.)

5 Transportation of medical cannabis; staffing.

Amends § 152.29, subd. 3a. Allows a manufacturer to staff a motor vehicle with one employee if the manufacturer is delivering medical cannabis to patients, registered designated caregivers, and other caregivers.

6 Manufacturer; mobile distribution units.

Adds § 152.292. Authorizes medical cannabis manufacturers to operate mobile distribution units in the geographic service areas served by the manufacturer.

Subd. 1. Operation of mobile distribution units authorized. Allows manufacturers to operate mobile distribution units in the geographic service areas served by the manufacturer, in which the manufacturer drives a mobile distribution unit to a specific location according to a predetermined schedule and distributes medical cannabis to patients, registered designated caregivers, and other caregivers.

Subd. 2. Locations for operation. Before a mobile distribution unit begins operations at a location, requires the manufacturer to obtain permission from the location's owner. Prohibits a mobile distribution unit from operating within 1,000 feet of a school.

Subd. 3. Staffing. Requires a mobile distribution unit to be staffed with at least two employees, at least one of whom must be a pharmacist.

Subd. 4. Notice of schedule. Specifies how a manufacturer may provide notice of the schedule of its mobile distribution unit.

Subd. 5. Deviation from schedule. Prohibits a mobile distribution unit from deviating from its schedule except as necessary for rest, fuel, or vehicle repairs, or due to road conditions.

Subd. 6. Security requirements. Prohibits a mobile distribution unit from carrying medical cannabis and medical cannabis products above a certain value, and requires a manufacturer to establish security requirements to deter or prevent theft or unauthorized access.
