Date March 10, 2020

Summary

This bill modifies Minnesota Statutes, section 245D.10, subdivision 3a, relating to termination of state-operated community-based services for individuals with complex behavioral needs. It makes clarifying changes, and specifies that services must not be terminated unless the individual no longer demonstrates complex behavioral needs that cannot be met by private community-based providers. The bill also requires license holders terminating services to document that they have consulted with the individual's support team to identify that the individual no longer demonstrates complex behavioral needs that cannot be met by private community-based providers, and requires 90 days' notice prior to termination of services for these state-operated community-based services.
