Overview

A pharmacy benefit manager (PBM) administers prescription drug benefits for health carriers and employers (often referred to as plan sponsors). PBMs maintain prescription drug formularies, process prescription drug claims, negotiate contracts with prescription drug manufacturers and wholesalers, manage pharmacy networks, and reimburse pharmacies. This bill requires PBMs to be licensed by the Board of Pharmacy under a new chapter of law, chapter 62W, in order to operate in Minnesota. The bill establishes requirements for PBMs related to fiduciary and other duties, network adequacy, transparency, and ownership interests. The bill also incorporates existing state laws related to PBM contracts with pharmacies into the new chapter of law, sets time limits for filling certain specialty drug prescriptions, and includes provisions related to enrollee costs and disclosure, and synchronization of refills, that were part of last session's vetoed health and human services finance bill.
