Summary

H.F. 3431 appropriates \$300,000 in FY 2023 to the Pollution Control Agency for the preparation of a report on potential strategies to reduce statewide greenhouse gas emissions in order to meet the state's reduction goals (30 percent on a 2005 base by 2030; 80 percent by 2050) and the U.S. goal under the Paris Agreement (50-52 percent on a 2005 base by 2030).

The report must quantify the reductions and estimate the cost to achieve them for eight separate sectors, including agriculture, forestry, transportation, and residential and commercial buildings.
