

Subject Load control equipment inspections

Authors Newton and O'Neill

Analyst Anna Scholin

Date February 28, 2023

Summary

Exempts equipment used exclusively for load control from inspection requirements, effective the day after final enactment, as long as the installation is:

- 1) done by a licensed electrician employed by a class A electrical contractor;
- 2) for replacement or repair of existing equipment of an electric utility other than a public utility; and
- 3) completed on or before December 31, 2028.
