Date March 6, 2023

Summary

House File 1973 amends the state greenhouse gas emissions reduction goal by establishing a 50 percent reduction target (on a 2005 base) by 2030 and a net zero target by 2050. Reduction efforts are to avoid disproportionate adverse impacts on communities that have been incommensurately overexposed to pollution.

The targets are to be reviewed annually by the Pollution Control Agency commissioner, and recommended changes submitted to the legislature.
