

Subject Administration of Drugs or Medicine

Authors Virnig and Others

Analyst Cristina Parra

Date March 4, 2024

Overview

Drugs and medicine must be administered consistent with school board procedures developed in consultation with a school nurse, a licensed school nurse, a public or private health or health-related organization, or with another party that provides school health services under an arrangement approved by the commissioner. These requirements do not apply in certain situations listed in statute. This bill modifies requirements for the development of the school board procedures for administering drugs and medicine, as well as one of the exclusions.

Summary

| Section | Description |
|---------|-------------|
|---------|-------------|

- | | |
|---|--|
| 1 | Exclusions. [Administration of drugs and medicine] Modifies exception to requirements for administration of drugs and medicine by including licensed nurses as school personnel that may determine that drugs or medicine should be given without delay. |
