

Subject Commercial energy code adoption

Authors Kraft and others

Analyst Anna Scholin

Date February 2, 2023

Summary

Allows the commissioner of labor and industry to adopt amendments to new commercial energy codes that are designed to mitigate the impact of climate change. Directs the commissioner, beginning in 2024, to adopt each new published edition of the model commercial energy code ASHRAE 90.1 or a more efficient standard, which shall establish efficiency and performance standards that result in buildings capable of being powered completely by carbon-neutral energy sources by 2036.
