

**H.F. 2317**

As amended by H2317A3

**Subject** Wastewater treatment waste heat recovery**Authors** Kraft**Analyst** Bob Eleff**Date** April 7, 2026**Summary**

House File 2317, as amended by the H2317A3 amendment, appropriates \$3,000,000 to the commissioner of the Pollution Control Agency to conduct a study to identify wastewater treatment plants in the state whose waste heat could be recovered and used to provide heat to buildings through an existing or new district heating system. The study would highlight both the challenges to implementing such projects and the benefits of doing so. This appropriation would also fund engineering review and design costs for a pilot waste heat recovery project located within the seven-county metropolitan area and one located in Greater Minnesota.
