

Subject Motorized bicycle and motorcycle regulations

Authors Dippel and Rehm

Analyst Matt Burress

Date March 11, 2026

Overview

This bill modifies requirements related to motorized bicycles (sometimes termed mopeds) and motorcycles, including in vehicle classification, registration, dealer licenses, and restrictions on sales. Effective August 1, 2026.

Summary

Section	Description
1	Legislative purpose. Expresses a legislative purpose statement.
2	Off-highway motorcycle. Amends the definition of “off-highway motorcycle” for sections of statutes that regulate this type of vehicle in off-road use, which includes explicitly adding a motorized bicycle when used in off-highway operation.
3	Dual registration. Authorizes motorized bicycle registration with both the Department of Natural Resources for operation as an off-highway motorcycle and the Department of Public Safety for operation on public roads. Excludes certain undefined types of vehicles from the dual registration authorization.
4	Definitions. Modifies the definition of “motor vehicle” for a statute governing motor vehicle dealer licensing and dealer regulations, to include a motorized bicycle that was not originally manufactured for on-road operation. This has the effect of extending regulations on vehicle transactions (such as sales and leases) and dealer license requirements to apply to these types of motorized bicycles.
5	Dealer license for trailers, plates, fees; exemptions. Removes motorized bicycles from the current dealer license category for motorized bicycles and some types of trailers (such as for snowmobiles and boats).

Section	Description
6	<p>Micromobility device.</p> <p>Amends the definition of “micromobility device” for the chapter on traffic regulations, including to reduce the powered top speed from 30 to 20 miles per hour, lower the maximum weight from 500 to 100 pounds, and remove motorized bicycles. This has the effect of narrowing the types of devices that can utilize a micromobility facility (e.g., in docking, storage, charging, or battery management).</p>
7	<p>Motorized bicycle.</p> <p>Amends the definition of “motorized bicycle” for the chapter of statutes on traffic regulations, to require that an electric motor (if installed as the power source) has an output between 750 and 1,500 watts.</p>
8	<p>Application to persons, places, and vehicles.</p> <p>Prohibits on-road operation of a vehicle that does not meet specifications of a vehicle in a statute that defines terms for the chapter on traffic regulations.</p>
9	<p>Electrical safety standards. (motorized bicycle)</p> <p>Prohibits sale of a motorized bicycle that is electrically powered unless it is certified by a third party as compliant with a specified standard on electrical systems for personal e-mobility devices.</p>
10	<p>Electrical safety standards. (motorcycle)</p> <p>Prohibits sale of a motorcycle that is electrically powered unless it is certified by a third party as compliant with a specified standard on electrical systems for personal e-mobility devices.</p>
