

MINNESOTA LEGISLATIVE TELEVISION COVERAGE

The Minnesota Legislature provides statewide broadcast, cable and satellite television coverage of legislative proceedings live from the Minnesota State Capitol. Coverage is provided during legislative sessions each year, Monday-Friday from 8 a.m. to 6 p.m., with extended evening and weekend coverage available for debates on high-profile issues. Legislative television coverage is created and produced as a public service by the Minnesota Legislature.

Coverage is delivered statewide on the Minnesota Channel, which is carried by Minnesota's six independent public television stations. Coverage is also available to adjacent areas in Wisconsin, North Dakota, South Dakota and Iowa. The Minnesota Channel is distributed through a variety of ways, including broadcast, cable and satellite. All programming distributed on the Minnesota Channel is closed-captioned.

For viewers using over-the-air antennas, legislative television coverage is available on the Minnesota Channel, which is broadcast by your local public television station.

For cable subscribers, legislative television coverage is available if your local cable system carries the Minnesota Channel. Check the list below, your local TV listings, contact your cable provider or call your local public television station to find the Minnesota Channel on your cable system.

Check the list below, your local TV listings, contact your satellite service provider or call your local public television station to find the Minnesota Channel on your satellite television service.
